

# Operator

- Lynn, MA
- Full-time

## Company Description

Veolia Group aims to be the benchmark company for ecological transformation. With nearly 220,000 employees worldwide, the Group designs and provides game-changing solutions that are both useful and practical for water, waste and energy management. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources and replenish them. In 2021, the Veolia group provided 79 million inhabitants with drinking water and 61 million with sanitation, produced nearly 48 million megawatt hours and recovered 48 million tons of waste. Veolia Environment (Paris Euronext: VIE) achieved consolidated revenue of 28,508 billion euros in 2021. [www.veolia.com](http://www.veolia.com)

## Job Description

### POSITION PURPOSE

The Plant Operator is an entry level position requiring 'hands-on' operation and monitoring of power plant and fuel handling equipment as directed by the Shift Supervisor and Control Room Operator.

### PRIMARY DUTIES / RESPONSIBILITIES

Ensure the plant and fuel handling equipment are operated in compliance with applicable regulations and company procedures and policies, Perform plant rounds and effectively communicate plant operating conditions and status to the Shift Supervisor and Control Room Operator, Complete basic boiler feedwater and boiler water tests and adjust chemical feed rates and boiler CBD rates accordingly, Operate fuel handling/transfer equipment (conveyors, feeders, etc.), Isolate and de-isolate equipment as part of the LOTO process, Troubleshoot operational problems, provide input into solutions and initiate maintenance requests, Assess risks posed by identified problems and ensure management and other plant personnel are made aware of those risks, Short term stand in for Control Room Operator, as required, Complete required logs and reports, Maintain a clean, safe work environment, Perform other duties as assigned.

## Qualifications

### Education / Experience / Background

The position requires a broad background in plant operations including boilers and auxiliaries, steam turbine-generators, fly ash and bottom ash, water treatment and biomass fuel handling. General knowledge and experience in industrial safety are required.

### Knowledge / Skills / Abilities

Good communication (written and verbal), negotiation and influencing skills are all essential. Solid computer skills: proficiency with database, spreadsheet, email, and word processing software required; Microsoft Office and Windows preferred.

**Required Certification / Licenses / Training**

The candidate will possess a valid BC Interprovincial Fourth Class Power Engineer's Certificate of Competency. Will be necessary to possess or be able to obtain First Aid certification. Physical Requirements Must be able to work, occasionally for prolonged periods, in extremes of hot and cold temperatures and inclement weather conditions. Must be able to tolerate dust and other airborne particles and work around other materials such as biomass, diesel and lube oils. Under certain conditions while working in the plant, may be required to wear a respirator. Required to wear safety equipment and clothing where appropriate. May require frequent stooping, bending, climbing, reaching, carrying and moving heavy objects with assistance when required. Must be able to work from ladders, scaffolds, and high-lifts, and in confined spaces.

HOURS OF WORK: Twelve (12) hour shift work will be required.
