

Construction Inspector - Resident Project Observer
AP Associates, Inc. – Millis MA
Project Location – Boston MetroWest Area

Position Description

Construction monitoring / resident inspection services for various municipal projects in the Boston MetroWest area. The immediate opening is for a full-time on-site inspector for a water main construction project starting on May 1, 2025, through project completion. Project duration is approximately six (6) months with potential for another similar assignment in the Fall.

Responsibilities

- Perform communications with the Contractor, Client and residents
- Monitor Contractor's activities for compliance with the Contract Documents
- Document daily construction activities and work accomplished in the project field logs
- Monitor and record quantities daily
- Review quantities with Contractor and reconcile daily in accordance with the Contract Specifications
- Maintain record of field changes and additional work orders
- Communicate Contractor's activities with AP Associates daily
- Report Client and / or residents' complaints, utility breaks and all other issues and concerns
- Respond to concerns and comments from residents and Client
- Monitor all testing performed as part of this project
- Attend periodic progress meetings
- Maintain records for generating as-built drawings by AP Associates at project completion

Qualifications

Seeking a candidate with a civil engineering degree and a minimum of 8 years experience with utility construction projects as an engineer and/or resident field inspector. Applicants without a college degree with construction related experience will be considered. Retired Water and or Sewer Superintendents, Public Works Directors, and Town Engineers who are interested in contractual work are welcome to apply.

AP Associates, Inc.

Small well-established civil engineering consulting firm in Millis, MA applying 40 years of engineering experience for successful completion of a myriad of projects. AP Associates, Inc was established in 2002 with primary focus to support municipal clients with their infrastructure improvement needs. Current and past contracts include, but are not limited to design, bidding and construction administration phase services for variety of municipal projects such as water mains, supply wells and pump stations, booster stations, new water treatment and storage facilities, upgrades to existing pump stations and treatment facilities, new standby generators, rehabilitation of existing water storage tanks, drainage systems, culvert replacements, sidewalks and roadway improvements.

Compensation

Compensation will be based on an agreed hourly rate depending upon the applicant's experience. The position is full-time, five days a week (except municipal holidays) being on-site from 7:00 am to 3:30 pm. It is agreed that barring any unforeseen or emergency conditions, the services will continue through project completion. There will be potential opportunities for other similar assignments this year and or next Spring and beyond.
